Frank,

I've just placed on the NODC anonymous ftp site, a total of 10 files, 9 are .zip files, when opened, contain a total of 9 - year 2002 to 2003 field period cruises, NE GLOBEC project. They are the CTD and associated variables data sets. I've also placed a copy of the accompanying data report on the site for your capture and use. (see info below). This may be the last of the NE GLOBEC data for a while, or so I'm informed by the OSU data mgmt. Anyway, go get 'em and send me an NODC accession as one is assigned. Data transmittal is attached.

Here's what was sent;

A) Zipped Data Files

- 1) w0202a.zip (80 kb), opened file has 11 stations (Wecoma cruise)
- 2) w0204a.zip (441 kb), opened file has 46 stations (Wecoma cruise)
- 3) w0207a.zip (435 kb), opened file has 47 stations (Wecoma cruise)

Frank:

I have placed on the NODC anonymous ftp site, a total of 9 .zip files, when opened, contain the year 2002-03 field season CTD data sets (9 cruises), with associated variables (see below). In addition, I have placed one .pdf file, when opened, is the accompanying cruise report. These data result from the NE GLOBEC project, LTOP program. The data were received via the OSU/COAS ftp site web server. They are "coastal ocean" data sets.
