

crosstab_file_descriptors.pdf

File	Description
qry_Video_AllSpeciesMF_SEFIS_Crosstab_2023.xlsx	This table provides mean frame counts for all species seen on videos collected by the SEFIS (Southeast Fishery Independent Survey) survey collected during the years 2011-2023. A 20-minute section of video is read, and fish counts are recorded for priority species at each 30-second interval (mean frames, N=41 frames).
metadata_qry_Video_AllSpeciesMF_SEFIS_Crosstab_2023.xlsx	Provides metadata for qry_Video_AllSpeciesMF_SEFIS_Crosstab_2023.xlsx
qry_AllSpecies_TrapAbund_SEFIS_Crosstab_2023.xls	This table provides trap abundances for all fish collected on the SEFIS survey (Southeast Fishery Independent Survey) during the years 2010-2023. Chevron traps are soaked for 90 minutes, and all fish collected are identified and enumerated.
metadata_qry_AllSpecies_TrapAbund_SEFIS_Crosstab_2023.xls	Provides metadata for qry_AllSpecies_TrapAbund_SEFIS_Crosstab_2023.xls
crosstab_file_descriptors.pdf	Describes all files associated with this new SEFIS Data
