Subj: Resend of the 1997 N. Puget Sound SedQual Data Sets.

Doug:

Per my email reply this date, here is a pc readable diskette containing 4 files of the 1997 N. Puget Sound NS&T Sed Qual data sets. I've also included a paper copy of the report for use. (You might mention to Don C. about receipt of this package, he was interested in the paper copy report.

Files Sent:

1) NPS97.nav.wind (16 kb) station locations, etc.

Sed Qual Data Files

2) NPS97.metals.tox.wind (29 kb)

3) NPS97.pah.tox.wind (88 kb)

4) NPS97.pest.tox.wind (73 kb)

These files were generated, extracting the Mac Excel spreadsheet tables and creating one individual file from each table. They are comma delimited, readable on a PC.

Hope everything got there ok.

Enclosures; one 3.5" diskette, one Sediment Quality in Puget Sound Year 1 - Northern Puget Sound (Dec. 1999) report.
