Other	AC1	Fixed	Sed. Grabs	3	3	3	NA	NA	NA	1	NA

Notes:

(1) An alternate station may be substituted for a fixed or random station when necessary (i.e., not acceptable % of silt/clay)

Additional fish stations will be added if necessary as dictated by catch results.

(2) Three cores will be collected from each station: 1 - chemistry/grain size/TOC, 1 - geochronology, 1 - archive

Only one gravity core will be collected from Z0-F1. Additional geochronology cores may be sampled for archive .

* Each sample is a composite of 3 - 5 fish livers.
