

Gordon Gunter Cruise 06
GIS Data and Products
Read Me

Data collected during Gordon Gunter Cruise 06 were transformed to Geographic Information System (GIS) formatted files for on-scene analysis and decision support. Station locations and subsurface plume information were mapped using Matlab software. This folder contains the original data and documentation provided by the ship to the Sub-surface Monitoring Unit. Information in the folders is identified:

Charts, Graphs, Maps, Plots - contains finished copies of maps resulting from the GIS viewer or statistical analysis software. These are provided in *.jpeg and *.png format.
