This form should accompany all data submissions to NODC. Section A, Originator Identification, must be completed when the data are submitted. It is highly desirable for NODC to also receive the remaining pertinent information at that time. This may be most easily accomplished by attaching reports, publications, or manuscripts which are readily available describing data collection, analysis, and format specifics. Readable, handwritten submissions are acceptable in all cases. All data shipments should be sent to the above address.

SOURCE MATERIAL (AUTHOR, TITLE, VOLUME, PART, PAGE, ETC.)

CalCOFI Hydrographic Data Annual Report of 1968 from Hopkins Marine Station of Stanford University. The entire data batch - 71-0603 - consists of one (1) sub-data set (1 cruise) containing 195 observations. The data is a series of observations taken at six (6) specific locations. The positions for these locations are recorded on a supplemental sheet. The vessel remains the same throughout the cruise as the TAGE. The stations are recorded in chronological order up until 25 April 1968 (pg. #6). From that point and to the end of the cruise, the following procedure should be employed for station #3 only. Information for the first and second Station Header Records should continue to be coded as given on pages 6 through 21. However, the Data Record information is to be coded from pages 22 through 25. Data Record information for station #3 on pages 6 through 21 should be ignored.
