The enclosed reel of magnet tape contains a final quality controlled version of the Station-S data set stations 1 thru 554. It is suggested that these data should be reprocessed to only one NODC reference number as they are time series measurements and will usually be requested in total. These data will appear in atlas form authored by Dr. Hank Stommel. The tape contains three files:

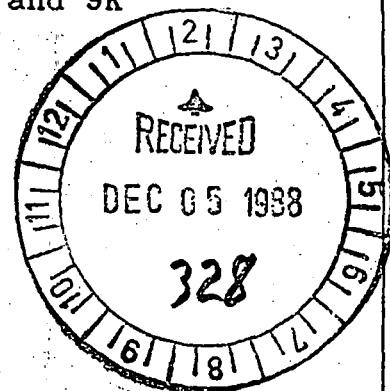

file #1	Panulirus	stations 1 thru 300
file #2	Panulirus	stations 301 thru 506
file #3	Weatherbird	stations 507 thru 554

The tape specifications are: 9 track, 1600 bpi, ASCII, reccsize=80, blocksize=4000, 3 files.

The format specifications are: SD2 format, deblocked to 80 byte records, standard level records removed (see sample dump).

For records keeping purposes this tape contains the following NODC processed data sets:

Please note: NODC ref. num. 3153191 has both ship codes within the same cruise?????

The ship code for the last two cruises is for the Weather Bird and is listed in the data as an alpha "O" and should be a numeric "0" according to our ship codes.
