Washington, DC 20009

Dear Sirs:

As per our conversation, two 3 1/2 in. disks containing CTD data taken during the International Ice Patrol cruises of 1990 and 1991 are enclosed. The data was placed on the disks using NODC's CTD Data format contained in section 4.1.3 of the NODC Users Guide.

The instrument used to collect the data was a NBIS Smart CTD, and a HP9826 was used to store the data. The raw CTD data was run through a downtrace program which filtered out the bad data caused by the rocking action of the vessel. This program also eliminated the uptrace.

For questions concerning the data, please contact MST2 Channel (203-441-2628) of my staff.

Sincerely,

A handwritten signature in cursive script, appearing to read "J. J. Murray".

J. J. MURRAY
