Figures 1-3 depict the mean number of days with measurable precipitation in March for the years 2003-2004. Each figure represents a different color-coded range of precipitation days. Figure 1 shows the distribution for those days where precipitation was 0.5 - 3.4, Figure 2 for days with precipitation of 3.5 - 5.4, and Figure 3 for days with precipitation of 5.5 - 7.4.
