

The NOAA Coral Reef Conservation Program (CRCP) Coral Reef Information System (CoRIS) Status Report July – September 2008

Highlights

- CoRIS released a new text search. This search allows users to search for all CoRIS products from a single interface without having to differentiate between metadata and library publications. The search is available from both the “Discover NOAA’s Data” section and the “Library” section of the website.
- The NOAA Central Library has created a canned search for the CRCP NOAA Technical Memorandum series. Users can get to the search by two different methods, either from the NOAA Virtual Publications Office web page or the NOAA Library Catalog (in the "Series Title" field type: NOAA Technical Memorandum CRCP).
- Quarter 4 overdue product were sent out at the beginning of October. Thirteen letters were sent out for 16 overdue products.

CoRIS Product Highlights

Metadata - The 2,212 CoRIS metadata records provide managers, researchers and the public access to 20,395 coral data products via the CoRIS web site portal. As can be seen in Table 2, CoRIS is still acquiring metadata. Between July and September 2008, CoRIS staff added 85 new metadata records and updated several hundred records.

Publications, etc. - CoRIS received 20 coral products for addition to the CoRIS Library from July to September, 2008. Types of products received include: publications, reports, web sites, presentations, posters, brochures, citations, and videos. The CoRIS web site provides access to 1,712 coral publications and online resources, referenced in either the NOAA Library or CoRIS Library database.

Tables

CoRIS is gathering coral reef data and publications from CRCP funded coral projects for users of the CoRIS web site, the NOAA portal to coral reef data and information. The following tables present summaries and details of CoRIS metadata, data and publication references, from NOAA's coral reef projects and other sources.
