Celebrate Our Reefs!

Guam has **over 100 square kilometers** of reefs in our nearshore waters between 0-3nm from shore.

Guam's reefs include fringing reefs, patch reefs, offshore banks, and barrier reefs.

Guam's reefs are home to **over 5,100 species!**

Our reefs provide **\$127 million each year** in economic benefits to our island through Tourism, Recreation, Fisheries, Research / Education, Amenity, and Coastal Protection.

Protect Our Reefs!

Join the Community Coral Reef Monitoring Program

Help us collect important information about the health of Guam's Reefs.

Real Hunters Don't Burn!

Report Wildland Arson to Department of Agriculture 735-3991

When fishing,

take only what you need – fish belong in our sea not in our freezers.

Reduce, Reuse, Recycle!

Use reusable shopping bags at the store.

Respect the Reef

Stop Marine Litter – if you can't recycle it, at least dispose of it properly.
