

**National Interagency Coordination Center
Incident Management Situation Report
Thursday, June 30, 2022 – 0730 MDT
National Preparedness Level 2**

National Fire Activity:

Initial attack activity:	Light (158 fires)
New large incidents:	3
Large fires contained:	1
Uncontained large fires: **	15
Area Command teams committed:	0
NIMOs committed:	0
Type 1 IMTs committed:	0
Type 2 IMTs committed:	7
***Complex IMTs committed:	0

***Complex Incident Management Teams (CIMTs) are configured to respond to large, complex fires and can expand and reduce staffing in all functional areas as necessary to meet the needs of the incident.

Nationally, there are 56 fires being managed under a strategy other than full suppression.

**Uncontained large fires include only fires being managed under a full suppression strategy.

Alaska Area (PL 5)

New fires:	2
New large incidents:	0
Uncontained large fires:	0
Type 2 IMTs committed:	4

Lime Complex (14 fires), Southwest Area, Alaska DOF. Transfer of command from IMT 2 (AK Black Team) to IMT 2 (AK Green Team) will occur today. Fifty miles east of Chuathbaluk, AK. Grass, timber and brush. Active fire behavior with flanking, running and torching. Numerous structures, communication and energy infrastructure threatened.

Clear, Fairbanks Area, Alaska DOF. IMT 2 (NW Team 10). Ten miles northwest of Anderson, AK. Timber and short grass. Active fire behavior with creeping, group torching and spotting. Numerous residences threatened. Evacuations and area closures in effect.

Bean Complex (5 fires), Tanana Zone, BLM. IMT 2 (NW Team 7). Started on state land 100 miles west of Fairbanks, AK. Timber and short grass. Active fire behavior with short crown runs, torching and spotting. Structures threatened.

Poorman Complex (3 fires), Galena Zone, BLM. Thirty-eight miles southeast of Ruby, AK. Timber. Active fire behavior with flanking, backing and running. Structures threatened. Last narrative report unless significant activity occurs.

Predictive Services Discussion: Hot and dry conditions are expected across much of the Interior, western, and south-central Alaska, with gusty winds over southwest Alaska. Isolated to scattered thunderstorms are likely across south-central Alaska and portions of the Interior as well. Dry and breezy conditions will continue along and east of the Sierra and Peninsular Ranges in California and likely spread east into portions of western and southern Nevada. Scattered to numerous thunderstorms are expected across eastern and northern Arizona, eastern Utah, western and northern New Mexico, Colorado, and southern Wyoming, with some drier thunderstorms possible in Utah. Strong to severe thunderstorms are likely across the central Plains into the Great Lakes along and ahead of a cold front. Thunderstorms are also likely along the Gulf and Southeast Atlantic Coasts spreading inland into south and east Texas, the Lower Mississippi Valley, and the southern Appalachians.

Today's topic is dedicated to all fallen wildland firefighters.

Nineteen firefighters were killed on the Yarnell Hill Fire in central Arizona on June 30, 2013, at 1642. The Granite Mountain Interagency Hotshot Crew (IHC) from the Prescott Fire Department was working on the south end of the fire west of Yarnell when they were overrun by fire. This tragedy occurred while the crew was traveling through an unburned area toward a safety zone when a rapidly advancing fire of great intensity overtook them. The fire's extreme speed of 10 to 12 miles per hour eliminated any opportunity for the crew to reach the safety zone or return to the canyon rim. The crew had less than two minutes to improve a shelter deployment site using chainsaws and burning out. The crew had deployed their fire shelters close together when the fire overtook them. The deployment site, in a box canyon with heavy brush, caused direct flame contact and extreme temperatures as the fire swept through and was not survivable. The loss of nineteen of the twenty Granite Mountain IHC had a profound impact on family and friends as well as on the Prescott Fire Department, the State of Arizona, the Interagency Hotshot Crew community, and all firefighters across the United States and around the world.

Following the accident, a Yarnell Hill Fire Serious Accident Investigation Team (SAIT) developed a fire report. The report concentrated on helping wildland firefighters of the present and future learn from the tragedy through sense making, reviewing decision points, and a video. This helped firefighters visualize what happened and how to best learn from the loss of the Granite Mountain IHC members. One recommendation from the report was that the State of Arizona lead an interagency effort to develop a Yarnell Hill Fire staff ride to remember these brave firefighters and to help future firefighters learn from this event.

Today we honor and remember the lives of the nineteen lost on this tragic day, but we also remember the lives of all fallen firefighters and honor them throughout this week. The anniversaries of such events should signal a reminder for all of us to seek improvement and pursue successful outcomes where we all safely come off the line at the end of each shift.

How do we as a fire community remember and honor the lives of those who were lost on these fires? We need to keep talking about and learning from what happened to bring change. We need to be open to assessing what we have learned from these events and be proactive in implementing the lessons learned moving forward.

The purpose of this week is to honor our fallen firefighters by **making a commitment** that we will apply the lessons we have learned every day, on every fireline we walk, and with every decision we make. Use the materials provided this week as a foundation for respectful dialogue and discussion. Apply these lessons to yourself, your crew, your team, and your unit. Ask yourself this: *How can these lessons help change us for the better?*
