

AVHRR Land Surface Bundle v5.0 (01B-20) Technical Note

Due to orbital drift of NOAA-19, data availability is degrading over time in the AVHRR Surface Reflectance CDR. Also impacted are the Normalized Difference Vegetation Index and Leaf Area Index and FAPAR CDRs, which depend on the AVHRR Surface Reflectance CDR as a primary input. Impacts appear more substantial during the (northern hemisphere) winter season.

Representative data availability of NDVI CDR:

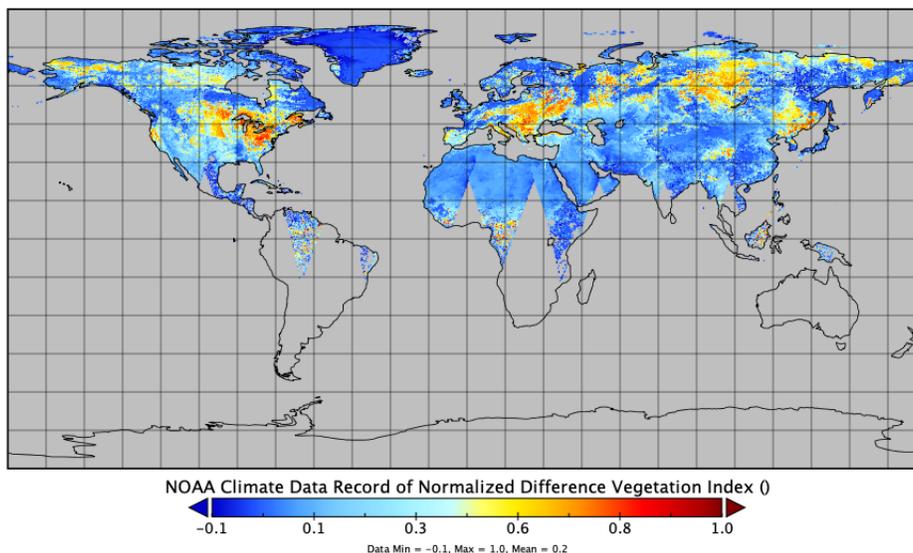

July 1, 2016

NOAA Climate Data Record of Normalized Difference Vegetation Index

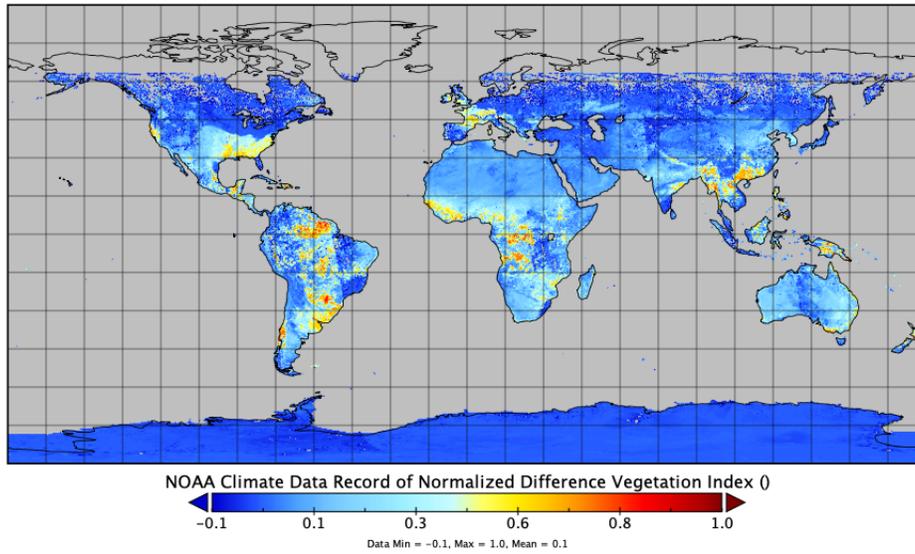

July 1, 2020
