

# US/UK World Magnetic Model - Epoch 2020.0

## Annual change declination (D)

Annual Change  
Declination (D\_SV)  
Miller Cylindrical Projection  
Contour interval: 2 arcminutes/year  
— Positive (clockwise)  
— Negative (counter-clockwise)  
— Zero change

Position of Dip Poles  
Blackout Zones  
Horizontal Field (H) Strength:  
— 0-2000 nT (Unreliable Zone)  
— 2000-6000 nT (Caution Zone)
